

Solenoid valve II, plastic casing

Solenoid valve

For installation in CONTI+ faucet bodies as a bypass solenoid valve for carrying out an electronic thermal disinfection, with connection cable and plug, with flow rate regulator.

Attributes:

Sorting: 423,

Technical Data:

Operating voltage: 6 V/DC

Input: 3 W

Operating pressure: 0,3 – 10,0 bar

Flow rate: 0,05 l/s (automatic flow regulator)

Water temperature max.: 70 °C (short-term up to 80°C for thermal disinfection)

Protection: IP68
