INNOVATIONS 2025

CONTI+ salina

Innovation for tomorrow's kitchen

Hygiene, innovation, safety and convenience all in one! CONTI+ salina KS10 and KS30 kitchen faucets are revolutionising kitchens all over the world, as all functions can be set electronically.

Particularly innovative: the 300° sensor activation area of the spout can be programmed fully electronically without the need to dismantle the tap. This ensures water flow or a hygienic flush can only be triggered when the spout is within the programmed swivelling area - for convenience and safety.

All functions can be programmed manually using the touch control panel integrated into the sensor ring or digitally using the CONTI+ Service APP or the CONTI+ CNX water management system.

300°

Comes with soft-jet-aerator
Timeless design
Easy installation
Smart device

CONVARIO

Maximum corrosion resistance
Antibacterial surface
Countless design options
With and without glass shelf

VERSATILITY

INDIVIDUAL DESIGN & HIGH-END TECHNOLOGY

CONVARIO shower panel made of high-quality mineral material is your key to countless design options! Whether in RAL colours, exclusive marble look or terrazzo: CONVARIO opens up completely new opportunities for the design of modern and luxury sanitary facilities.

With its fully electronic water path, the shower panel offers state-of-the-art technology. Extended hygiene functions (like hot and cold water flushes) ensure maximum hygiene and comfort.

CONTI+ frame system

Quickly set up walls in your sanitary facilities

Whether for new buildings, extensions or conversions: with the new frame system by CONTI+, concealed showers can be integrated flexible and quickly into any environment. Perfect for drywall construction, they offer reliable support and sound insulation as well as clearly calculable installation times and material savings.

Cutting-edge technology meets functionality: CONGENIAL adaptive multi-function water path ensures precise control, while an economical 9 l/min water flow and five different shower head options create a bespoke showering experience.

Versatile in use:

- Quick installation solution
- Pre-wall installation
- Can be integrated into stud wall installations
- Adaptable to floor structures from 0 – 220 mm
- Can be extended to 400/600 mm

The system includes

- 2-piece system for easy installation
- Wall supports, fixing kit and premium wall bracket
- Pre-assembled CONBOX pipe installation kit
- Includes flush connector for hygienic commissioning
- Including a protective coverage during construction

Can be perfectly combined with CONTI+ shower solutions:

- CONTI+ CONHEAD shower heads
- CONGENIAL water path
- CONGENIAL concealed shower cover plate

SET UP WALLS FLEXIBLE AND QUICK

Features

- Self-supporting galvanised and sound-insulated 48 mm steel frame
- Sound-decoupled, galvanised feet
- Swivelling plastic feed, depth suitable for installation in U-profiles UW50 and UW 75
- Height-adjustable traverse fitting

Central Management – no matter the size:
Whether small public baths or extensive spas,
CNX 2.0 makes it possible to manage all
sanitary facilities online from a central point.

Networking on top level:

Seamless integration with existing building management systems (BMS) ensures perfect coordination between CNX 2.0 and the rest of the building infrastructure. Thus the operation and control becomes even more efficient.

Flexibility and control redefined –

With the ability to integrate key switches and dry contacts CNX 2.0 gives operators unprecedented control over the management of their systems. Actions can be easily grouped and automated for greater safety and flexibility.

Intuitive operation:

The new, user-friendly interface makes system management easier than ever. Complex tasks can be completed in no time at all.
